PROFESSIONAL SUMMARY

Full Stack Developer building modern web applications using the MERN stack and SQL-based systems. Skilled in creating responsive frontends, scalable REST APIs, and handling backend logic. Passionate about solving real-world problems and delivering user-focused solutions. Seeking to grow in a collaborative team while contributing to impactful projects.

TECHNICAL SKILLS

Frontend: React.js (Pro), JavaScript (Pro), HTML5, CSS3, Tailwind CSS, Next.js (Pro)
Backend: Node.js, Express.js, REST APIs, JWT Authentication, SupabaseAuth, Clerk
Databases: MongoDB, Mongoose, PostgreSQL (Advanced), SQL (Advanced), Supabase
Languages & Tools: TypeScript (Advanced), Git, GitHub, VS Code, Postman, npm, Vite, Render
Certification & Training: Full-stack-webdevelopment, Bachelor of Computer Applications

EXPERIENCE

1. Admin Hospital Management Dashboard (HMS)

Stack: React, Node.js, Express, MongoDB

Built in under 12 hours during a timed Online hackathon. Developed an intuitive dashboard interface for managing hospital data such as patients, doctors, and appointments. Used role-based access and REST APIs for seamless data management. I made it to the last round. The judge said the design was very clean and better than others.

2. Task Manager - Level UP

Stack: React, Node.js, Express, MongoDB

A gamified to-do app where users can manage tasks, gain XP, and level up based on task completion. Emphasizes motivation through progression mechanics. Features include task CRUD operations and a clean UI. It was a part of Group project where I contributed my Backend skills and Leadership skills to carry the team. The certificate

3. Blog-Based Social Media Platform ([GitHub](#))

Stack: React, Tailwind CSS, MERN

Created a blog-style social media app where users can post and share stories. Worked on user authentication.

4. ChatGPT Wrapper Clone using GEMINI API ([GitHub](#))

Stack: React, Node.js, Express, MongoDB

Developed a basic front-end clone of ChatGPT with plans to integrate full-stack AI interaction using Google's Gemini API.

5. Password Manager – Souls III Edition

Stack: React, Toastify, React-Icons

A Dark Souls III-themed password manager with secure credential storage and toast notifications with creative UI inspiration.
